WEDDING PLANNING

FIRST THING FIRST, YOUR WEDDING IS ALL ABOUT YOU!!

When you don't know where to start a wedding planner or as we like to call ourselves a wedding designer is the answer!

Our working style depends upon every clients individuality. We believe in constant communication so that we are always synced with all the proceedings and all the feedback can be integrated in our style of working.

Planning for weddings is stressful and this is exactly where we step in and once we are aligned with your ideas, it's showtime for us.

We work with you , for you and sincerely believe that a phenomenal wedding does not have to be high priced.

So sit back, relax and enjoy your pre-marriage phase. Focus on taking those wedding vows while we take care of the wedding woes.

WHY YOU NEED TO HIRE US?

BECAUSE WE PUT YOU FIRST.

We do not go according to any fixed plans, our strategies are not set in cement. We are a team of dedicated individuals with a bunch of ideas sitting eagerly to integrate it with your ideas and give you the perfect wedding of your dreams.

Time is important and we value time, both yours and ours. Our widespread network and experience in the industry enables us to get the work done on time and under budget.

We present our clients with unbiased opinions and options. We believe in transparency in every domain. If we do not like a particular vendor's work, we do not recommend them nor force our clients for any particular vendor.

Proud members of the smartphone era, we will stay in touch, may be even to an annoying level. We are in this work for the love of it and a good wedding for us is another job well done.

Just as your wedding needs to be planned, it also needs to be styled and designed. The entire look needs to be conceptualised. How else will you build a solid cohesive look and bring those pinterest boards to life.

Taking inspiration from your story and life, we translate your ideas and dreams into reality making your wedding a reflection of your personality.
